Allowable Subject Matter

1. Claims 2-4, 6-14 and 19-22 are allowed.

The following is an examiner's statement for reasons for allowance.

2. Claim 6 is allowable over the prior art of record since the cited references taken individually or in combination fail to particularly teach or fairly suggest a controller comprising at least two channels, each channel with a data buffer for storing data items, and a control register with the data buffer to store control data, which is settable to define for which data element's or data elements' data items are to be stored in that data buffer, and an interface mechanism for controlling the transfer of data items between the at least one channel and the data slots of the data link based on control data, wherein the data buffer of each channel is arranged to store data items both having the same sampling rate and different sampling rates.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - US Patent (6226758) to Gaalaas et al
 - US Patent (5889480) to Kim
